

Recommended Project Plan

Partner Portfolio Manager

A high-density CRM-style interface designed for the lifecycle management of all provisioned entities. It allows administrators to filter the network by Partner Type, status, and registration year, providing drill-down capabilities into specific partner metadata and historical performance.

Suggested Files:

- pages/partners/index.tsx
- pages/partners/[id].tsx
- components/partners/PartnerDataGrid.tsx
- components/partners/FilterSidebar.tsx
- hooks/usePartnerDirectory.ts

Commission Settlement Ledger

The financial engine of the application that tracks payouts and referral fees linked to specific Partner IDs. This page features a technical ledger view for calculating commissions, managing tax documentation, and authorizing emerald-green 'Disbursement' actions.

Suggested Files:

- pages/finance/ledger.tsx
- pages/finance/payouts.tsx
- components/finance/TransactionTable.tsx
- components/finance/PayoutCalculator.tsx
- utils/commissionLogic.ts

Network Performance Analytics

A data visualization suite that tracks the ROI of the provisioning program. It displays real-time conversion rates for generated referral URLs and uses luxury-futurism charts to show which partner types (BRK vs. AFF) are driving the most capital to Moonshine Capital.

Suggested Files:

- pages/analytics/performance.tsx
- components/charts/ConversionFunnel.tsx
- components/charts/PartnerTypeHeatmap.tsx
- components/analytics/StatCard.tsx
- services/analyticsService.ts

Digital Asset Distribution Hub

An automated repository for marketing materials. This page allows administrators to generate branded PDFs, banners, and pitch decks that are pre-populated with the partner's unique ID and referral link for immediate deployment.

Suggested Files:

- pages/assets/generator.tsx
- components/assets/AssetPreview.tsx
- components/assets/DownloadManager.tsx
- services/assetCompiler.ts
- styles/assetTemplates.css

System Sentinel & Audit Vault

A high-security log and configuration center. It displays the complete technical history of the 'Execute Provisioning' engine, including API latency, system health metrics, and a forensic audit trail of every ID generated to prevent duplicates or unauthorized access.

Suggested Files:

- pages/admin/sentinel.tsx
- pages/admin/audit-trail.tsx
- components/admin/SystemHealthMonitor.tsx
- components/admin/TerminalLogView.tsx
- middleware/auditInterceptor.ts
